**THE PROGRAMME
IS OUT**

GLANCE

INTERACTIVE

Sessions, formats, topics: it's all in the Programme!

The information you've been waiting for is now at your fingertips. Make the most of **#AfricaPCR 2023** by reviewing the Programme's cutting-edge content and selecting sessions that best fit your educational needs.

Browse the overview, a handy timetable for quick reference, or consult Interactive Programme for more details. Either way, you will find sessions about the hottest topics, including **renal denervation, TAVI, femoral access challenges, calcified lesion, pulmonary balloon valvuloplasty, blue baby, left main bifurcation, coils and snares, STEMI and multi-vessel disease.**

All this great content is delivered in adapted formats, such as **LIVE demonstrations, learning sessions, case-based sessions** and comprehensive **How Should I Treat** sessions relevant to your daily practice.

Prepare your own programme in advance, take advantage of your course's best science, and get ready to get together in Johannesburg **on 3-4 March.**
