## CALL TO PARTICIPATE

### Dear Valued Members,

In 2015, World Heart Federation (WHF) launched the Global CVD Roadmaps in a bid to drive efforts within national agendas to reduce CVD burden. The Roadmap framework has been developed to be used as a tool to influence change to national policies, and intended to be developed for priority cardiovascular health areas.

The survey will take approximately **10-15 minutes** to complete.

### Who should be involved?

Our aim is to collate the views of as many countries as possible. We therefore ask each of our members to ***share this survey with relevant individuals*** who they feel can appropriately take part in providing this feedback. This is your opportunity to offer the feedback and input of your country or region, so we strongly encourage your participation.

### Next Steps?

The feedback provided through this survey will inform the work of the Roadmap evaluation.

### Deadline

The survey will be open until **3 February 2023**. Please ensure that we receive your feedback before this date.

We thank you in advance for your valuable contributions.

Kind regards,

**Dr Thomas Gaziano** | Chair, WHF Science Committee

**Prof Fernando Lanas** | Roadmap Liason Officer, WHF Science Committee

**Lana Raspail** | WHF Programme Officer
