Call to Participate

Dear valued colleagues,

The practice of primary angioplasty (pPCI) has globally improved the prognosis of STEMI patients over the last decades, albeit to varying extents in the different regions and countries.

As part of its mission to (continue to) expand the delivery of guideline coherent therapy and patient access to the lifesaving indication of pPCI - (SSL) is launching a global electronic survey to **assess the procedural variation in the performance of pPCI** with the hypothesis that there would be a significant variation across regions and countries

We would therefore like to call on you as **interventional cardiologists** to complete this Online Survey (link below). The survey consists of 12 focused questions requiring less than 10 minutes to answer. The objective is to get as many physicians as possible from each country to take part in the survey **by 30 November 2022**.

Should you have any questions, please feel free to contact contact@stentsavealife.com.

Thank you very much for your contribution.

Best regards,
Helder Pereira
Jan Piek
Thomas Alexander
Sandrine Wallace
